

AASKEREIA

ΑΣΚΙΔΕΪΑ

Designdocument: Aaskereia: Odin's Hunt

Team: NØRDS

Members:

- Rebecca Chemata (OMB)
- Timo Melnicki (OMB)
- Fabian Mieg (MIB)

Genre:

3D Hunting Adventure Game (nordic mythology style)

Fundamental gameplay type:

Role-Playing

Single Player Game

Third-Person

Platform:

PC

HCI/Controller:

- Mouse & Keyboard

Target Audience:

- Fans of the nordic mythology (min 12 years)
- Fans of adventure games who want to be challenged

1. Player (character(s) / surrogates / player's visual substitution):

Name: Olaf Ironbeard & Syr Stormshield

Likes: They love beer

Weaponskills: Sword and Bow.

Skills: Tracking, Survival, Herbalism, Trapping, Animal Knowledge

Armor: Light Armor

Background Stories:

- **Olaf Ironbeard:**

In the frosty lands of Nordheim (name of the village), where the towering fjords cut through the landscapes emerged a legendary figure among the Viking clans - Olaf Ironbeard.

Born in the heart of the fierce clan of Frostfang (clan name), Olaf was destined for greatness. From a young age, he displayed an impressive talent for tracking, hunting, and wielding the bow with deadly precision. As he matured, he became one of the most skilled hunters in Nordheim. That's why he is the chosen one, for Odins great mission.

Olaf's parents, brave warriors of the Frostfang Clan, met their fate during a fierce battle and died protecting the village from an overwhelming enemy.

As the young Olaf witnessed the heroic sacrifice of his parents, their last words echoed in his ears, building the determination in him. Their passing became the catalyst for Olaf's unwavering commitment to the divine mission entrusted to him by the gods.

Despite the weight of his mission, the viking hunter carries with him a heart as warm as the fires in Muspelheim, and his love for beer flows as freely as the tales he tells his fellow warriors in the mead halls.

- **Syr Stormshield:**

Also born in the heart of Frostfang, Syr's destiny was shaped by the beauty of the wilderness. From her earliest years, she formed a strong connection with the natural world. Her mastery of the bow and her ability to move like a shadow through the forest marked her as an impressive huntress.

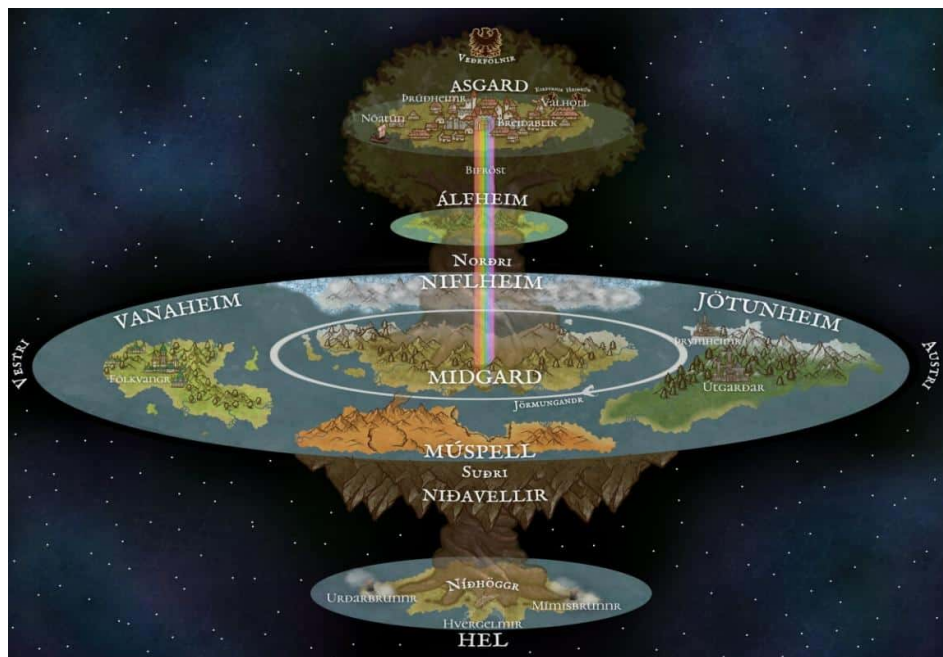

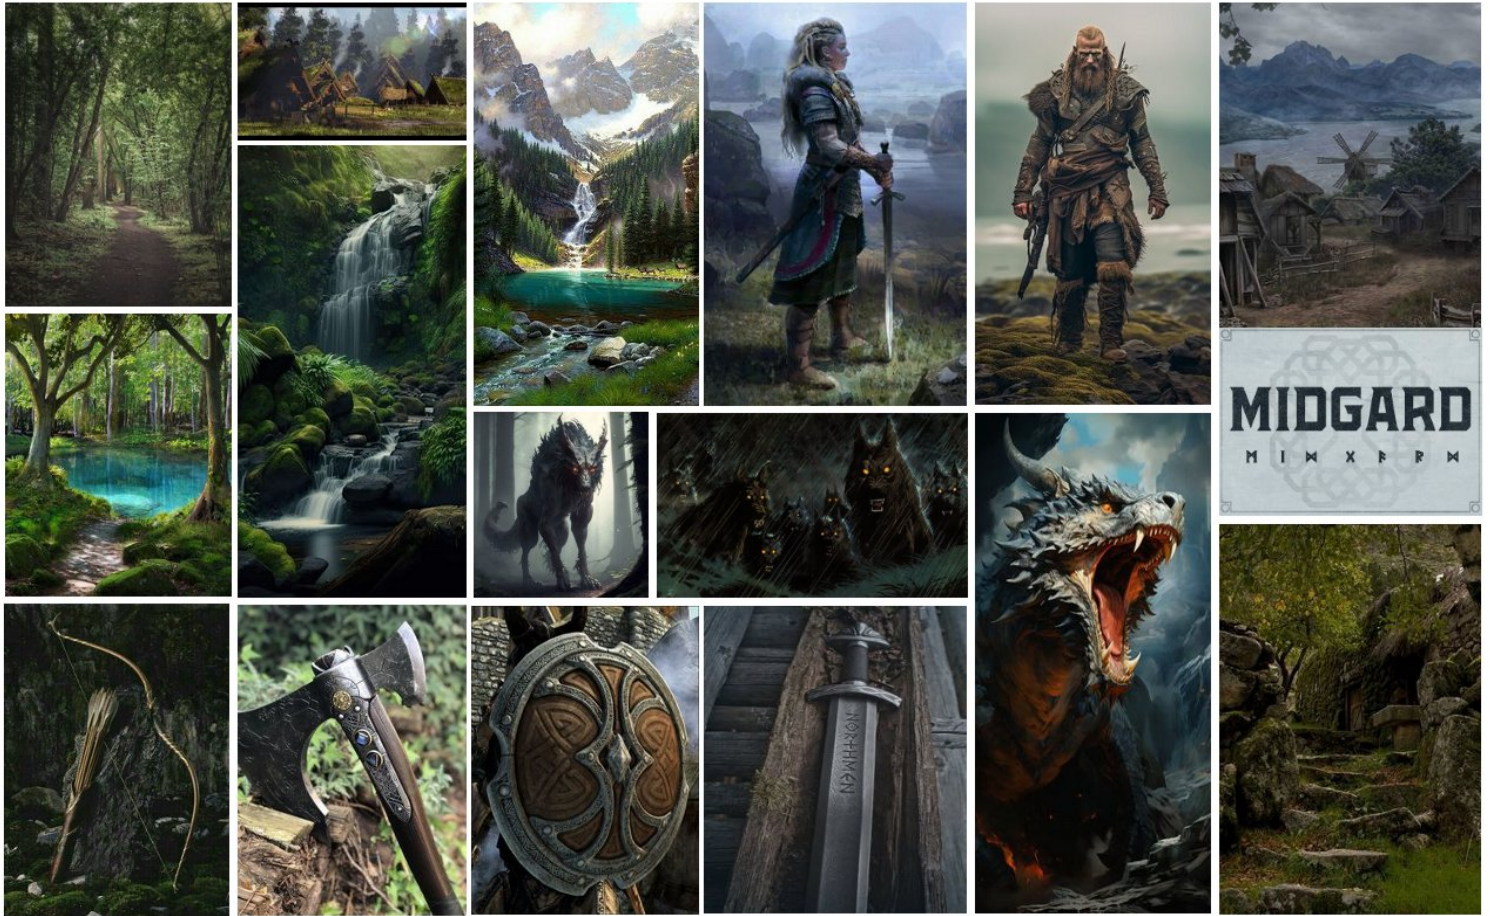

Despite demonstrating her skills, her journey was marked by sidelong glances and muttered doubts. Many believed that a woman could not bear the weight of the revered title of Stormshield, a title traditionally reserved for male warriors.

Nevertheless, Syr is chosen by the gods and entrusted with the mission to protect the nine realms. Determined to prove her fellow warriors wrong, her journey becomes not just a quest to restore balance to the realms but also a defiance against the social norms that denied her potential.

Syr's love for beer flows as freely as the tales she exchanges after her great victories and is as unyielding as her dedication to the divine mission.

2. World (description): Moodboard Midgard

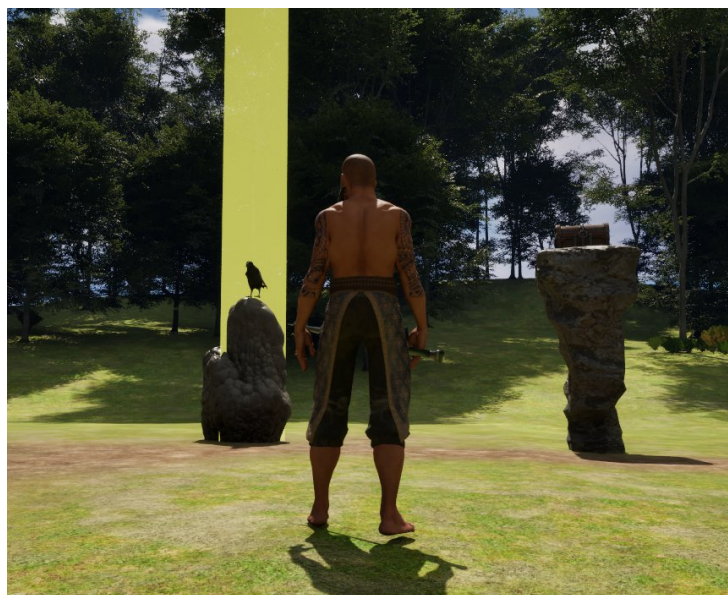

3.Narration/Setting

Yggdrasil, the world tree with the nine realms, is in great danger. Loki, the cunning god of mischief, has made it his glorious purpose to dethrone the Allfather Odin and rule in his stead. He has formed a temporary alliance with the mighty forces of Muspelheim and Jotunheim as well as Niflheim. Furthermore, he has used his manipulative powers to control and strengthen the creatures of the realms. Wolves, Draugrs and other creatures are now more dangerous than ever.

Weakened by previous battles, the Gods are now looking out for a human champion to stop him.

Our main character is a Viking hunter/huntress on Midgard who notices the strange behavior of the animals in the forest. They notice a three-eyed raven that leads them to a rune circle, where they receive a vision of Odin calling them to defend the nine realms.

4. Level/Mission-Scheme

Level 1:

The Main Character starts with:

50% HP

1 Sword

1 Beer

Basic Armor

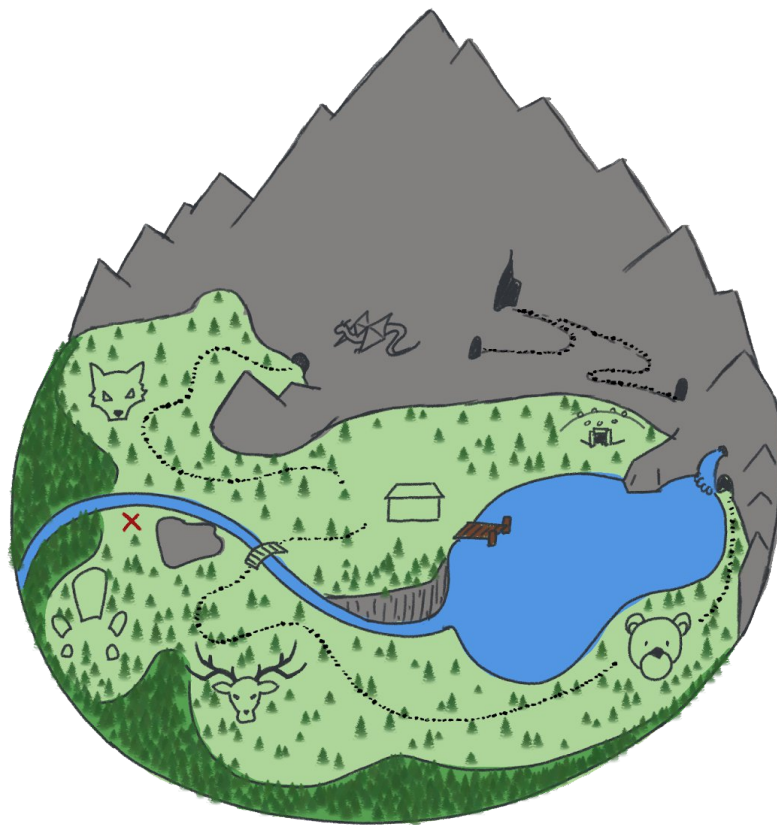

Minimum:

Wolf or Bear BossEndboss-> Continue to Lv2

Max:

All 5 Bosses-> Better Gear + Continue to Lv2

There are also some drops and objects to find, so the Player can upgrade his Gear and become stronger.

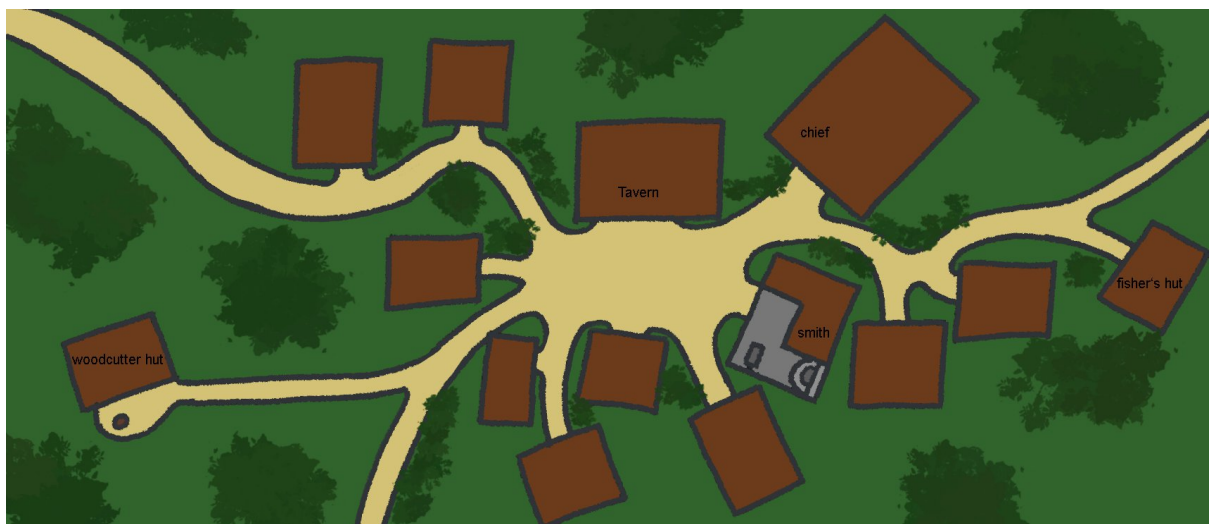

Quick-Walk-Through

Player controls the character in a starting area, where the tutorial takes place. First, he learns how to heal himself by drinking a beer. He also learns how to jump, run and attack by navigating through the forest and hunting a small deer.

As soon as the player kills the deer, a three-eyed raven lands on top of the dead animal and instructs the player to follow it.

The player follows the raven, which leads him to a rune circle that activates as soon as they stand in the middle. A cutscene, "Odin's Vision" plays.

After the cutscene, the raven leads the player to a nearby village. The player can choose to follow the raven or to explore the world on their own. In the village they can interact with various NPCs who provide information about the whereabouts of the wolf and stag bosses. After defeating one of them, the Player unlocks the Mountain Region where they can find the final boss.

Village Concept:

NPC 1:

Name: Borkel Thorinson

Family: No wife, no kids, two brothers Morkel Thorinson, Thorkel Thorinson

Job: barkeeper

Importance in game: Is talking to another NPC who is a stranger (we don't know his name)

The stranger might be important later

The barkeeper tells him about the village and the nearby places

-> for example the grave where he can find the beer mugs

To the player:

We tell him about the Odin Vision and the weird behaviour of the animals

-> After a short conversation he tells us about his brothers and sends us to them

NPC 2:

Name: Thorkel Thorinson

Family: The sons Thorse Thorkelson und Thorfin Thorkelson, no wife (died from illness)

Job: Woodcutter

Importance in game: Provides information about the stag in the woods

NPC 3:

Name: Morkel Thorinson

Family: One daughter Brundel Morkeldottir , a wife Brunhilde Flokidottir

Job: Fisherman

Importance in game: Provides information about the wolf on the other side of the sea

Example :

His weak point is his left side, so the attacks come from the right

-> because he did hit the wolf with his axe in the left leg

NPC 4:

Name: Ivar the Smith

Family: Wife Ivonne Hamerdottir

Job: Smith

Importance in the game: Tells us about better gear (maybe gear upgrades)

NPC 5:

Name: Hendrik Halvarson

Family: No family (all killed)

Job: Warchief

Importance in the game: **Endboss** who is actually a dark elf from Svartalfheim and shapeshifted into with Lokis Power

5. Game Mechanics

Combat:

- Light Attack
- Heavy Attack
- Dodge
- Block
- Healing (Costs Gold to refill)

Combat Enemies:

- Normal Attack
- AOE Attack

Gear system:

- Gear with better stats can be found throughout the world
- Boss drops provide the Player with better gear

Player Attribute System:

- Strong enemies reward the player with “Essence” which can be used to increase one stat (Attack, Health, Stamina)

Skills:

- Tracking
- Allows the Player to Track down wild animals by identifying their pawprints.

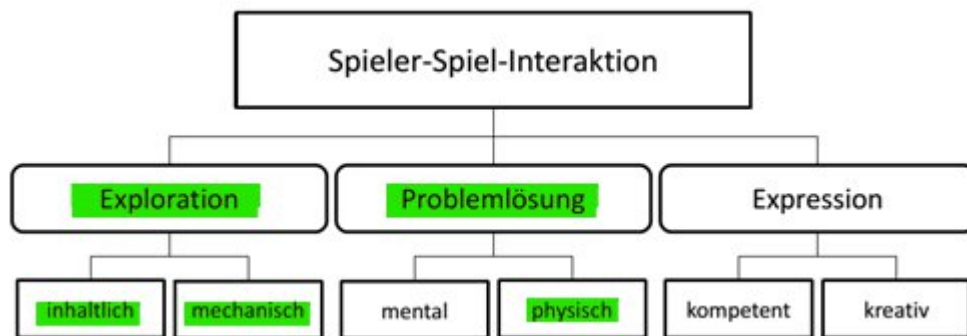

Surprise Mechanic Loki spawn:

- Random Encounter with low Lvl Mobs

6. Gameplay/Joy of Play/ Ludology (player motivation)

The fun of our game is exploring the variety of Nordic worlds, stocking up on equipment and holding your own against increasingly challenging opponents (means: fights). All the while, you are constantly being challenged and coming across new clues that will eventually reveal the true villain.

7. User Interface

Controls

Keyboard:

W -> Walk forward

A -> Walk left

S -> Walk backwards

D -> Walk right

Hold Shift -> Sprint

Q -> Dodge

E -> Interact with Objects

R -> Heal

Mouse:

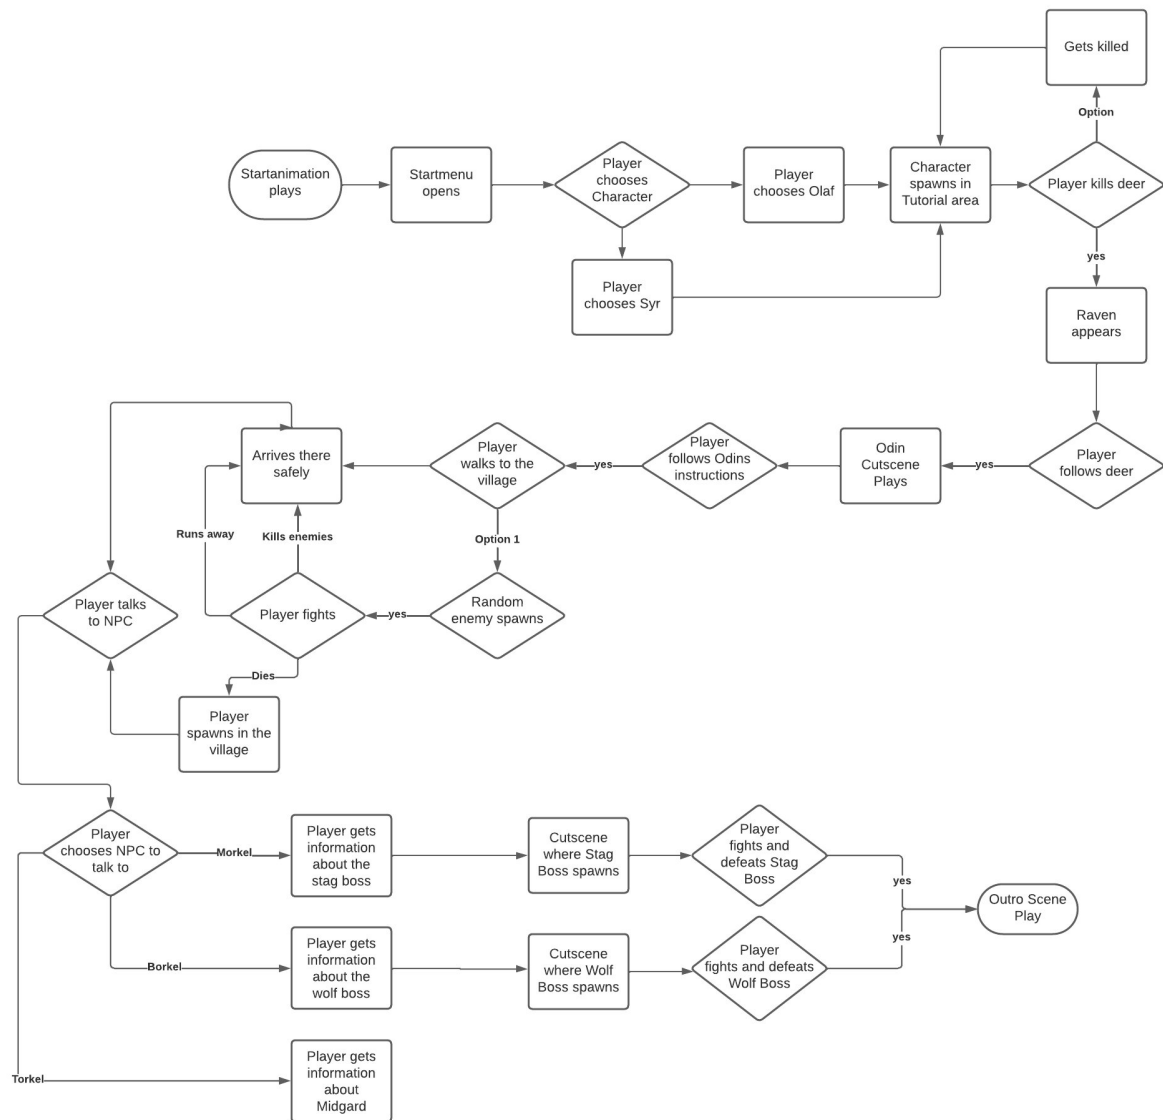

Move Mouse -> Camera Movement

Left -> Light Attack

Right -> Heavy Attack

8. Level Design and Flowchart

8. Helpful Tutorials

- [Unreal Engine 5 Beginner Tutorial](#)
This tutorial helped us to learn the basics of the Unreal Engine and to understand certain windows and their functions
- [Unreal Engine 5 Blueprint for Beginners](#)
This tutorial helped us understand how blueprints work, why we use them and how to edit our own. We used this to implement our Sprint function for example
- [The Easiest Way to Make a Simple Enemy AI in Unreal Engine 5](#)
With the help of this Tutorial we created our dog enemy AI. It could't attack yet, but it was animated and followed the character
- [How To Create A Melee Combat System in Unreal Engine](#)
With this tutorial we were able to implement a simple combat system with the dog enemy who was created before. We learned how to use character animations, how to hit detect and lose health in process
- [Lets build RPG! Unreal Engine 5 Ambient Environment Sound](#)
This tutorial was helpful to implement ambient sounds for our forest
- [How to make a simple Dialogue System in Unreal Engine 5](#)
With this tutorial we were able to implement our Morkel, Torkel and Borkel NPCs, who provide us important information about the bosses in our game
